Faculty Research Seed Grants Process and Information

AdventHealth University (AHU), through its External Funding Steering Committee (EFSC), competitively awards Faculty Research Seed Grants in the fall and spring trimesters to qualified AHU faculty and AHU faculty/student teams.

Objectives

The Grants, Alumni, and Philanthropy (GAP) Department aims to support the following funding objectives:

- To assist in promoting and establishing an active research program at AHU.
- To enable faculty and faculty/student teams who are active in research to be more productive than they would be without the financial assistance of a Faculty Research Seed Grant.
- To assist faculty and faculty/student teams who are active in research to develop their research line to successfully apply for funding from external sources.
- To assist faculty and faculty/student teams who are active in supporting student scholarship development.

Grant Funding

At AHU, the research process and research dissemination are terms defined as follows:

- The research process is defined as activities utilized by investigators to gather data, analyze results, and write findings.
- Research dissemination is defined as any method or activity that investigators use to convey research results.

The Faculty Research Seed Grant may be used for the needs of the research process but is not available for expenses associated with research dissemination.

Grant funding for the research process covers the following expenses:

- Student labor (undergraduate and graduate). Student labor may be used for support functions, such as clerical work, literature searching, etc. Please refer to the AHU HR

student labor rate at <https://my.AHU.edu/academics/university-research/internal-research-grants-opportunities>.

- Student research assistants for student-led or student-collaboration research that will result in their contributions to the research project, especially coauthoring the presented/published results. Please refer to AHU's HR student research assistant rate at <https://my.AHU.edu/academics/university-research>.
- Travel for data collection purposes. This includes travel for work with off-campus research collaborators, field-based research, and external resources fees.
- Miscellaneous supplies, consumables, software, and small equipment (not exceeding \$2,500 in value). The purchase of computers or other hardware is excluded.

Grant Approval Criteria

Applications are evaluated based on the following:

- Academic merit: quality of research project that is scientific, evidence-based, and contributes knowledge to the field.
- Collaboration: preference for grants will be awarded based on the greatest level of collaboration. For example, an application that includes multiple full-time AHU faculty, students, and other AdventHealth departments or Centers of Excellence will be given priority over an application that has multiple full-time AHU faculty and students. An application from multiple full-time AHU faculty and students will be given priority over an application that has multiple full-time AHU faculty only. An application that has a single AHU faculty member and an AH collaborator will be given preference over one with multiple full-time AHU faculty only. Or an application that has multiple full-time AHU faculty only will be given priority over an application from a single full-time AHU faculty only.
- While preference will be given to full-time faculty members, applications from adjunct or part-time faculty who wish to conduct research to advance AHU's research agenda will be considered.

Faculty members may apply for Faculty Research Seed Grants up to \$3,000 to support research projects at AHU. If two full-time faculty members submit a joint application, the maximum

support is \$3,000 per faculty member, or \$6,000 total for the application. Applications with more than two full-time faculty members will remain capped at \$6,000.

Applications for multiple Faculty Research Seed Grants on a single project may be submitted. Preference for funding awards will be:

1. First time submission.
2. Second time submission with the same project.
3. Follow up with the same project.

Second or subsequent submissions after a first-time grant that has resulted in publishing or external funding sources will receive preference over those without.

Faculty Research Grant Application Process

Review Process: Each year, two grant application windows will be open for Faculty Research Seed Grants early in each of the fall and spring trimesters. These dates will be announced each year on the website: <https://my.ahu.edu/academics/university-research/internal-research-grants-opportunities>. An announcement will also be sent by e-mail to AHU Faculty a minimum of one month before the submission deadline. All Faculty Research Seed Grant applications and renewals must be submitted by their deadlines; no exceptions will be granted. The grant application is part of the AHU Web-based Research Project Submission Process.

The EFSC will evaluate all applications and recommend funding allocations to the Provost through the Research Office (RO). The Grants, Alumni, and Philanthropy Department will include at least two invitees involved in research and recommended by the Provost when considering applications. The RO will notify the investigators of the decision on their application. The EFSC has 15 working days after receipt of applications to make a decision. Funds will be available for use no later than 15 working days following notification of funding for the following 12 months. Grant requests must be for projects that are already approved by the SRC and IRB, where applicable, that have been submitted through the Web-based Research Project Submission Process. Grant funds may not be awarded and will not be released for research that is not approved by SRC, IRB, and EHS, as applicable.

Reports: A report on the research should be submitted to the Research Office within 15 months of notification of grant funding. A final report or progress report must also be submitted with or prior to a faculty member submitting a second grant request.

Unspent Balances/extension request: By default, all unspent grant balances revert to the research fund after the 1-year grant termination date and will be used as funding for future Faculty Research Seed Grants. A grant extension request, including justification to carry over unspent funds from the initial 12-month grant period for up to an additional 12 months maximum, may be submitted to the RO at least 30 days before the end of the initial 12 months' grant period.

Renewal of a current Faculty Research Seed Grant: A grant renewal (resubmission of the same project to a new grant fund) must be submitted by the deadline of the Faculty Research Seed Grants early in each of the fall and spring trimesters; no exceptions will be granted. Renewals may be requested for a maximum amount of \$1,500 for new funding plus any remaining funding from the current grant, up to a total of \$3,000. This additional funding may be requested for up to an additional year, after which a full grant application would need to be submitted for further funding.

The Faculty Research Seed Grant applications will be available online at <https://my.ahu.edu/academics/research>. Applications will be due at dates posted on the website.

Intellectual Property Information and AHU Patent Policy

The intellectual property rights resulting from faculty members whose research is supported by a research grant is assigned according to AHU's policy as described in the current Employee Handbook. Faculty members who wish to receive continuing support from research grants must report income generated by royalties or sales of products in the "External Funding" section of the Research Grant application. Faculty members may apply for funding for expenses that are in excess of that which can be covered by royalty or sales income. Research that can be reasonably funded out of royalty or sales income may not be eligible for research grants funding beyond an initial start-up period.
